

ACCELERATED RECEIVABLES SOLUTIONS EMBRACES NEW ACA HEALTHCARE GUIDELINES

March 30, 2007 –Accelerated Receivables Solutions (ARS) and sister company Magnet Solutions (MS) have embraced *ACA International's* innovative set of guidelines for agencies specializing in the collection and payment of healthcare receivables. “Healthcare Collection, Servicing and Debt Purchasing Practices–Statement of Principles and Guidelines” were overwhelmingly adopted by the ACA Board of Directors on February 22, 2007. The guidelines were written due to the increasing amount of healthcare providers recognizing the importance of patient-centered care within the healthcare industry; and as a tool to be utilized in the growing healthcare debt purchasing market.

The new guidelines focus on the following four major areas: “Patient Communications”, “Business Relationships”, “Legal and Compliance”, and “Operations”. The guidelines aid agencies and debt purchasers in the ongoing attempt to optimize services being offered to healthcare providers and to their patients. Through adherence to these guidelines ARS/MS will be further enabled to provide their healthcare clients with assurance that their receivables will be handled ethically, legally, and professionally.

Embracing the ACA guidelines was not a difficult decision for ARS/MS. The new guidelines mirror the ethical, customer driven manner in which ARS has conducted business since its time of creation, making the decision very easy. At ARS/MS we view our clients with the utmost respect. We believe that by embracing the “Healthcare Collection, Servicing and Debt Purchasing Practices–Statement of Principles and Guidelines” we are simply demonstrating our commitment to customer service.
